Thanks Donn....

Glad to hear from you! I read the article in the Houston Chronicle today, and wondered how things would be handled. Timely follow-up.

Mary Jane

Community Awareness Committee;

We wanted to alert you to some new information regarding the San Jacinto Waste Pits Site:

In response to EPA's directive, the potential responsible parties submitted a work plan on December 21. The Plan addresses EPA's requirements to delineate damage to the cap, collect sediment samples to determine if any materials were released into the environment, and conduct necessary repairs.

EPA has approved the portions of the PRPs' plan to begin delineation of the damaged area and collection of samples and this activity will begin immediately on Wednesday, December 23.

EPA will continue to work with the PRPs on the portion of the plan regarding the necessary repairs. Equipment and materials to repair the cap are expected to arrive on December 29 and will take

9746060

from 1 to 2 weeks to complete. EPA will be on-site during the assessment and repair activities to ensure compliance with the approved work plan. Quality assured sample results will be available to the public.

Thanks.
